IAJES

International Association of Jesuit Engineering and Sciences Schools

IAJES is a subset of IAJU that leverages the capacity of Jesuit engineering schools to and promote the Jesuit mission to a new generation of engineers, scientists, and researchers.

IAJES includes:

64 Jesuit engineering schools worldwide

500+ Active members across 6 regions

8 Task Forces, each with specialized projects

Current Site

Current Homepage

IAJES's current web presence is largely
static and informational

Limited ability to:

- Discover people, institutions, or expertise
- Navigate relationships across schools
- Support collaboration beyond announcements

Project Goals

Design an elegant site

A billboard for IAJES.
Show professionalism & modern adaptability to engage new engineers.

Encourage communication

A platform where
IAJES members can
connect easily and
quickly for research.

Develop frugally

A standard for all FIH
projects: Develop simple and
affordable solutions without
compromising performance.

Motivation

Connect & represent the IAJES community

- Provide meaningful profiles instead of static lists
- Strengthen visibility of the global IAJES network

Enable the...

- Discovery of people and institutions
- Cross-school collaboration
- Scalable future features (events, research, admin tools)

Transform IAJES from

Information
Repository

Interactive
Ecosystem

Main Features

IAJES member database

Find fellow researchers and Task Force members.

Newsletter manager

View articles on-site or through your email.

Dynamic content for future use

Easily editable by non-web developers.

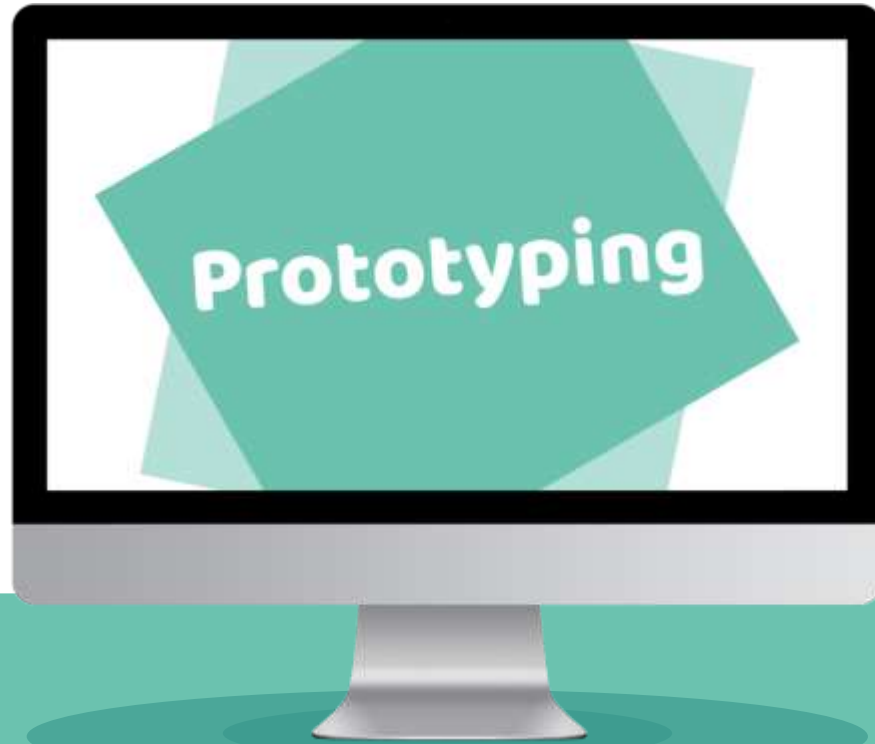

Centralized information about IAJES

Organized clearly in intuitive categories.

Requirements

1	The website must allow users to sign in, with different capacity of control over the site depending on what role the user has.	Permissions
2	Updates to the website shall be reflected for all users using the website	Information Consistency
3	The website must support editing information known to be need of regular updates without accessing the code or database	Easy Editability
4	The user profiles must allow a user to send an emailed message through the website.	Member Connection
5	The website shall serve as a platform where IAJES members can discover and connect with each other.	Member Discovery
6	The website must allow admins to create, edit, and send newsletters to a predefined mailing list	Newsletter Publishing
7	The website shall be developed in a frugal manner and resources used in development shall be easily affordable and accessible.	Frugal Development
8	The website design shall be appealing to visiting users on any screen size	Visual Appeal

Our planning and prototypes.

Software Stack

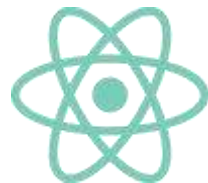

Figma

Branding, mockups and design wireframes

React & React Router

A performant, component-based front-end framework

Tailwind CSS

Standardized, modular styling

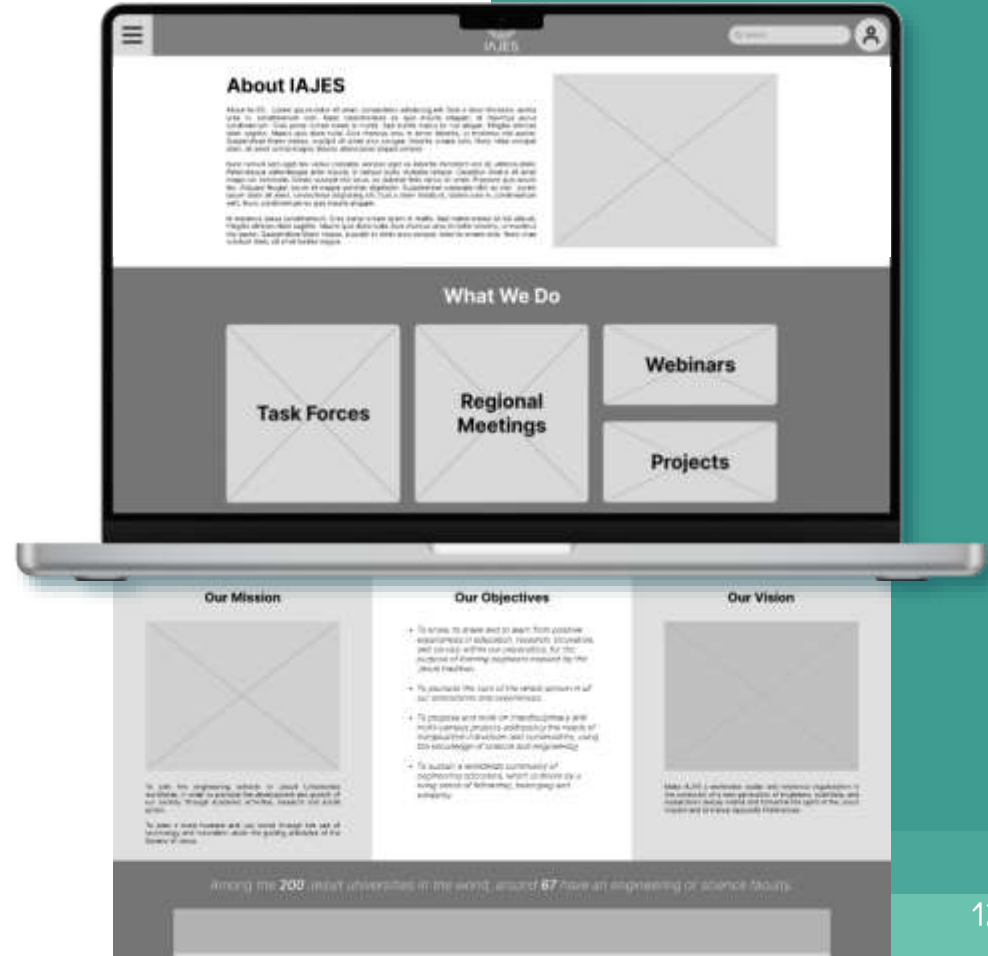

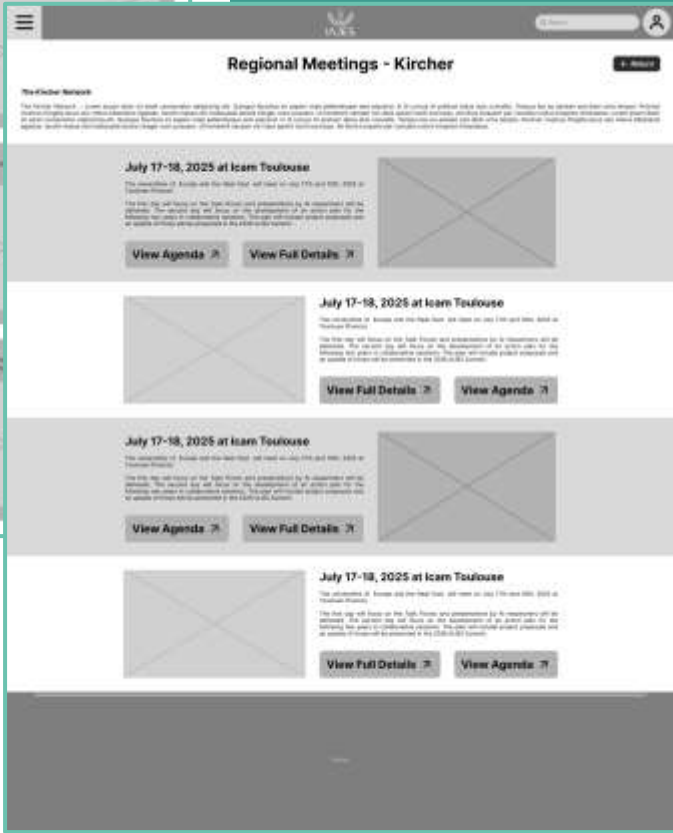

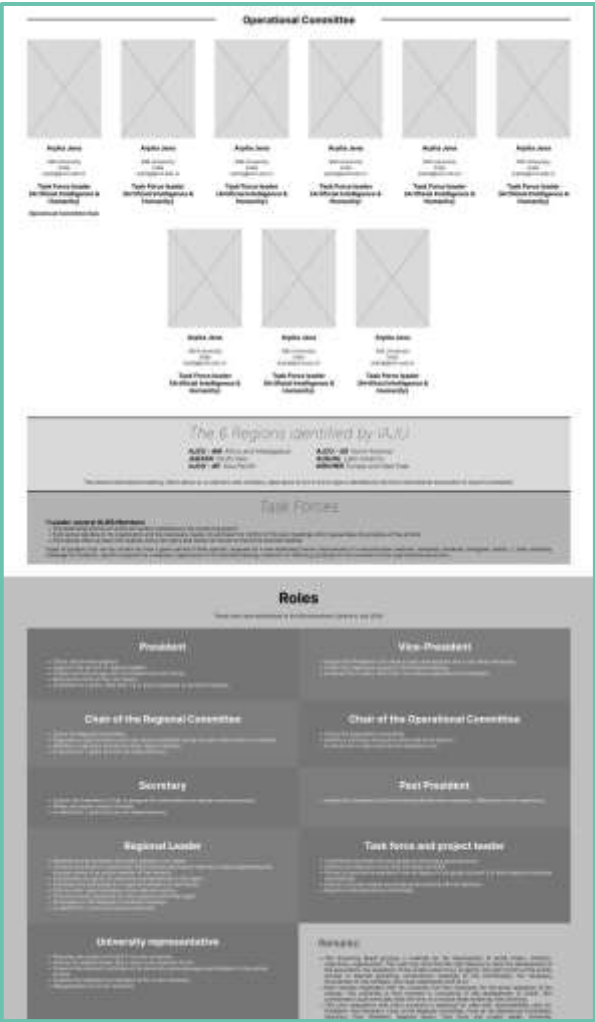

Supabase

Authentication and real-time database

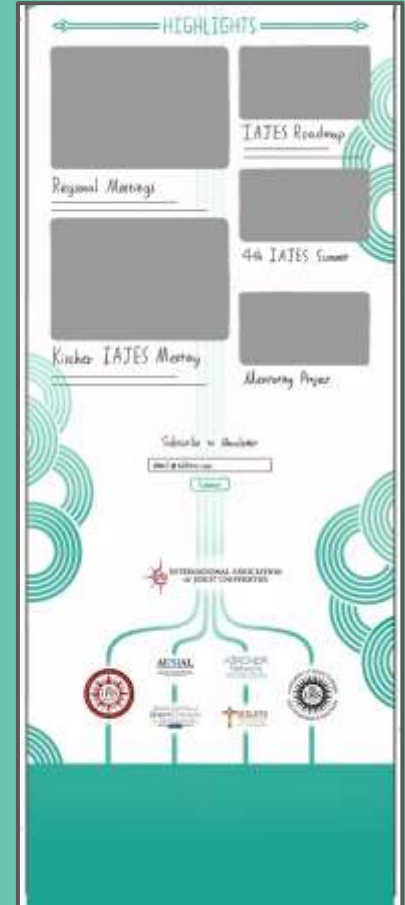

Hi-fi Wireframes

Coding the final product.

- Administrator Management

The image shows a user profile card for Isabelle Hu. It features a circular profile picture of a young woman with dark hair. To the right of the photo is a teal button with a white envelope icon and the text 'Contact'. Below the photo, the name 'Isabelle Hu' is displayed in a large, dark font, and 'Student, SCU' is shown in a smaller, lighter font. To the right of the name and role, there is a short bio: 'I'm a student at Santa Clara U... studying Web Design and Eng... an experienced front-end deve... digital illustrator.' The background of the card has a dark blue header with a pattern of concentric circles.

Student, SCU

I'm a student at Santa Clara U...
studying Web Design and Eng...
an experienced front-end deve...
digital illustrator.

Dynamic Information

Editable Pages:

- Announcements
- Task Forces
- Video Resources
- Webinars
- Regional Meetings
- International Meetings

All stored on

The Supabase logo is centered on the right side of the slide. It features a stylized, light teal arrow pointing to the right, with the word "Supabase" in white, bold, sans-serif font overlaid on it.

Supabase

Branding!

Risk Factors

	Risk	Likelihood	Impact	Mitigation
Incomplete or Delayed Data Integration	Real IAJES data may be incomplete or delayed	Medium	Limits functionality of search and profiles	Communicate early & often with IAJES engineers
Authentication and Role Management	Complex user roles (admin, faculty, student)	Medium	Feature delays or access issues	Early establishment of back-end and extensive testing
Expanding Scope Beyond Timeline	Too many features too early	High (common in redesigns)	Incomplete or unstable deliverables	Gantt chart, update IAJES frequently, reduction if needed

Deployment on IAJES Architecture

June: Presentation to IAJES
Governing Board

[Our live website.](#)

“The team demonstrated exceptional **technical proficiency** and **professionalism**... taking the time to **deeply explore our requirements** and propose insightful solutions. The final product exceeded our expectations; the **sophisticated design and streamlined functionalities** will significantly enhance our **networking and outreach capabilities**. They consistently placed our vision at the center of the process, and we could not be more satisfied with the result.”

Raul Garcia

*IAJES Vice President,
Director of the Department of Technological and
Industrial Processes @ ITESO Universidad*

“The new website will enable the IAJES leadership to achieve better **communication** with members of the network, facilitating **contact** and fostering **collaboration**. It is a **clean, user-friendly** site, and it will greatly **help us bring together** the engineering schools of universities entrusted to the Society of Jesus around the world.”

Carlos Rivas

IAJES President, Professor @ Universidad Centroamericana José Simeón Cañas
